Profile

I am a student, keen on entering the buissness analytics. I am currently completing the final year of a Data Analytics and Social Research master's degree at the Jagiellonian University. My main interests lie in quantitative research, social data analysis, data visualization, and database management. I am self-motivated and enjoy exploring new solutions and areas for professional development.

English language certificate
B2+

Projects

10/2021 – 06/2022	**The Impact of Combining Work and Studies at Kraków's Universities** The project was conducted as part of university classes. Over the course of a year, we worked on creating a qualitative research study, progressing through all stages of research creation, from conceptualization to tool development, conducting interviews, and finally, compiling the final report.
02/2022 – 06/2022	**Prevalence of Alcohol Consumption Among Youth** The project was conducted as part of university coursework. While working on the quantitative methods analysis course, we conducted a study focusing on examining the image of alcohol among young people, issues related to alcohol, and exploring the correlation between alcohol consumption and mental health
01/2025 – 02/2025	**European Social Survey Data Analysis 2023** Analyzed data from the European Social Survey to examine social and political attitudes in Poland, utilizing categorical principal component analysis and correspondence analysis to identify patterns of values and voting preferences based on demographic variables
